# STARCLUSIVE

Client intends to develop the exclusive Social Media Platform where Fans (Members) can connect with the celebrities (Performers) by subscribing or add as Favourite their personalities, idols, stars, content creators, artists and celebrities. Here during the registration as normal user (Member), they need to purchase the “Startip Package” which user can spent on their performers during live event, during purchasing the stuffs, sending the “Startip” to their performers randomly and subscribing the performer’s subscription.

**sales@avestantechnologies.com**

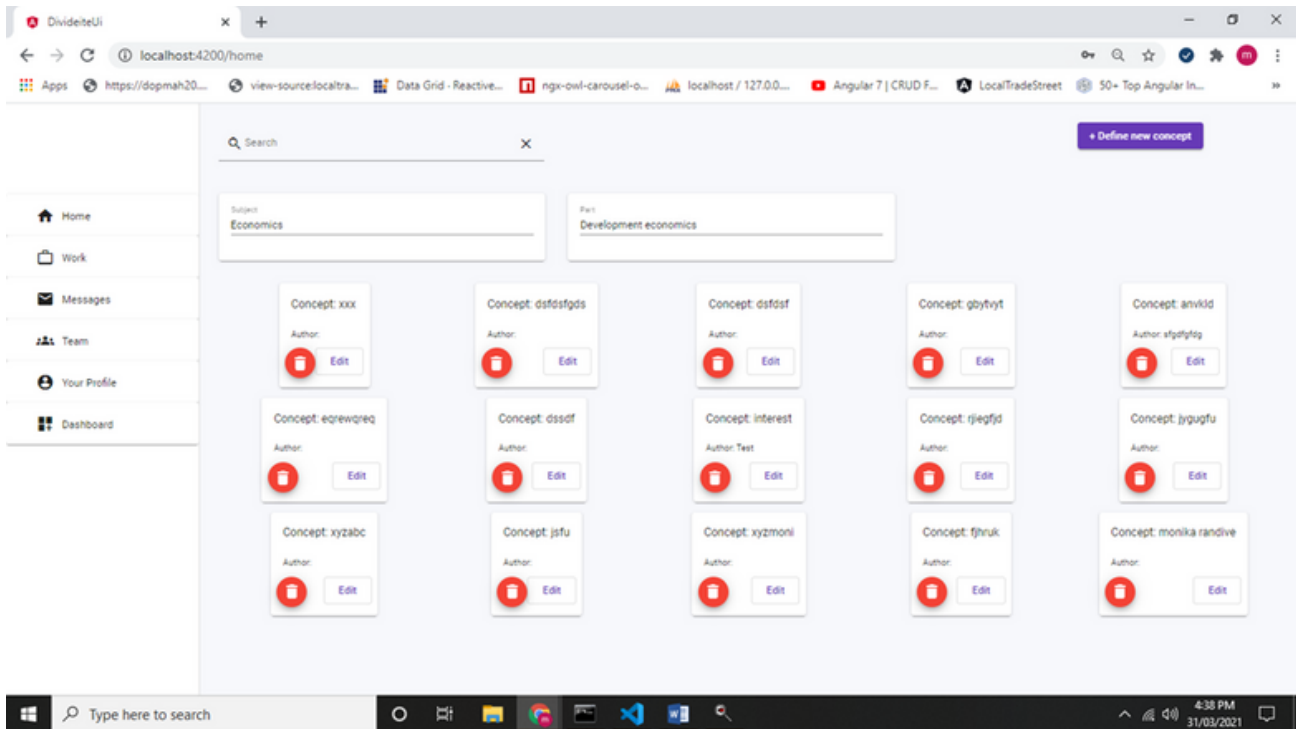

# FLAVOUR BRIDGE

The main work of Flavour Bridge is to suggest local and nearby restaurants to users and receive orders from them. Users can place orders from their favorite restaurant based on ratings and reviews shared by previous customers. Perhaps this is why more and more startup owners are interested in developing an app similar to Flavour Bridge. It offers comfort to the users and helps business owners reach their local food business to new heights. Flavour Bridge working flow is simple.

# DAVIDITE

DAVIDITE is a proprietary multi-paradigm programming language and numeric computing environment developed by MathWorks. Devidite allows matrix manipulations, plotting of functions and data, implementation of algorithms, creation of user interfaces, and interfacing with programs written in other languages. Although Devidite is intended primarily for numeric computing, an optional toolbox uses the MuPAD symbolic engine allowing access to symbolic computing abilities. An additional package, Simulink, adds graphical multi-domain simulation and model-based design for dynamic and embedded systems.
